

translating the plurality of data into a plurality of actions with respect to the target application;

transmitting the plurality of actions to the target application for externally operating the target application; and

relaying feedback from the target application back to the user.

REMARKS

The Examiner's attention to the application and clarification of the previous Office Action is appreciated. At this point, the Applicant regrets, however, that he does not have the financial resources to substantively address all of the Examiner's rejections of the claims in this application. Accordingly, Applicant makes this Amendment without prejudice to his desire to later pursue any or all the original subject matter in one or more continuation or divisional applications when funding becomes available. Reconsideration of the remaining subject matter in this application is respectfully requested.

Applicant has amended independent Claims 1, 13, and 22 to include the "wireless interface" subject matter of dependent Claims 11 or 21. No new matter is presented.

The Examiner had previously rejected Claims 11 or 21 under 35 U.S.C. § 103 solely on the basis of the following statement:

While Chiang does not disclose expressly a wireless interface, such would have been obvious to a person of ordinary skill in the art at the time of the invention to incorporate Chiang's invention for the purpose of providing a portable system that can be used anywhere.

The Examiner did not provide any basis or support for this statement. Reconsideration of this subject matter is respectfully requested.

In addition, as suggested by the Examiner, Applicant is filing an Information Disclosure Statement regarding the patent references cited during the International Stage of this application.

The Commissioner of Patents and Trademarks is hereby authorized to charge any fees under 37 CFR § 1.17 to Deposit Account No. 03-3840. A duplicate copy of this fee authorization sheet is enclosed for this purpose.
